

Meeting Minutes Team 16

26/09/2023

Participated: Vlad Ursu, Botezatu Marius, Bucătaru Daniel, Telug Anatolie, Ciumac Alexei

Assisted: Mihail Mandiş - mentor

Discussed:

1. High-Level Architecture of the app.
2. Tools to be used.
3. Security mechanisms to be implemented.

1. Status of Tasks in progress:

No	Task	Responsible	Initial deadline	Status	New deadline
1	Produce the business requirement document for the product.	Vlad Ursu	25.09.2023	100%	
2	Create the online repository for the project	Vlad Ursu	22.09.2023	100%	
3	Create Use-Case Diagrams for the project	Marius Botezatu	25.09.2023	100%	
4	Create Sequence Diagrams	Daniel Bucătaru	25.09.2023	100%	

2. Commentaries on Tasks in progress:

During this week's tasks the overall architecture of the app was defined, along with the necessary tools that will be used:

JHipster for constructing the structure of the project.

Java Spring Boot for the back end.

MySQL for the database.

React for front end.

3. Allocation of New tasks:

For the next week the team will start working on the app and will perform threat assessment algorithms to determine the possible vulnerabilities of the app.
